What the World Needs. **NOW**[®]

Solar Electricity

Solar Hot Water

**For Homes, Businesses,
Dealers and Contractors**

Welcome To A Clean Energy Future, Now.

A clean energy future is here. Energy from the sun is all around us, powering our lives. And it's easier to use than ever before. Come be part of the solution.

We make it simple for our customers to power their homes and businesses with clean solar energy. That means cutting high energy bills, reducing our dependence on foreign oil and taking action on global warming.

gro's solar division, groSolar, gives home and business owners the ability to live their lives efficiently and securely through **clean solar power**.

From start to finish, groSolar supports your energy needs through:

- > Effective professional site analysis.
- > Uncompromising design that enriches the architectural integrity of your property.
- > Fast, reliable installation.
- > World-class customer service for the life of your system.
- > Close to zero maintenance.
- > Peace of mind from the highest performing, cleanest, safest energy systems available.

“Solar energy helps people live their values and control energy expenses. We founded the company on the belief that a clean energy future could be delivered to all energy consumers in North America - TODAY. With a solar system on every roof, the impact of energy bills will be reduced and citizens will experience the power of making their own energy.”

– Dori and Jeff Wolfe, groSolar founders

Our Mission Is Simple

Delivering peace of mind through solar energy systems and whole energy appreciation.

Creating economic opportunities for shareholders while being socially responsible in business and community.

Providing sustainable, world-class clean energy products and services with quality and care.

Energy Solutions For Your World

Your Energy Improvement Program

groSolar provides energy solutions for your home and business. It's a simple, complete, high-quality source of energy for your long-term use.

From city house to country home, small office building to large warehouse – our solutions work! **You get all the power and the savings as well as peace of mind.** Within almost every household budget, a homeowner can reduce their hot water bill up to 70 percent or produce a significant portion of their electricity.

Many states offer tax credits or direct incentives that reduce the cost of your system.

groSolar makes solar easy. From initial visit through completed paperwork, we take care of all the details, **you get the power.**

What the World Needs. NOW

groSolar is North America's premier provider of solar energy systems. We pre-engineer and distribute the finest solar products and work closely with the leading manufacturers in the industry, including Evergreen Solar.

Our partnerships and exemplary reputation throughout the solar industry mean that our customers always have the best technology and highest quality products. Whether working directly with groSolar, or one of our dealers, you can be assured that the products provided are the finest in the solar industry, backed up by excellent support and engineering.

IT'S SIMPLE AND EASY

groSolar takes this technology further and provides the highest quality installation available. A careful, thorough design customized for your building and trained and experienced groSolar or independent installation crews set us apart.

In less than a week groSolar can have your new solar system generating clean power for your building.

We are there every step of the way to help you reach your clean energy objectives.

We all know that climate change is real. From governments to property owners, we have recognized the need to reduce our own carbon emissions, to change the way we make energy. Let groSolar help you do your part, easily.

Energy Solutions

Photovoltaic Electricity (PV)

Product advances and utility rules now make generating clean solar power a simple reality. Solar power provides secure and stable electricity to nearly any building. These solutions deliver silent and effortless electricity while reducing dependence on insecure, polluting forms of electricity. These other forms contribute to global warming and are rapidly increasing in cost. Generate a portion or all of your electricity with solar power, TODAY!

Solar Hot Water (SHW)

Solar hot water systems replace a significant portion of your hot water needs with clean, reliable solar heated water. Our systems can reduce your reliance on fossil fuel and electricity. And once installed, costs for hot water are stabilized at a cost less than fossil fuels. Depending on your local climate and needs, a system for your home heating, domestic hot water or pool may be recommended.

Zero Energy

groSolar can also assist individual property owners and developers in integrating energy efficiency and solar energy into their new designs. From Zero Energy to reduced energy buildings, we have the engineering capability, experience and systems to deliver complete designs and turn-key solutions.

Why groSolar?

- > Slash your energy bills
- > Eliminate rising energy prices
- > Combat global warming
- > Reduce dependence on foreign oil
- > Make America more secure
- > Protect your family's future
- > Increase the resale value of your building

Our Team

We have been providing clean solar energy solutions to home owners, businesses and dealers for over a decade. Our systems are tailored to your needs. Visit us online at groSolar.com or contact us directly. We are ready to help you anytime with a simple solar solution.
