groSolar provides turn-key solar systems to businesses, large and small. We custom design, expertly install and can assist with financing on commercial projects. We have worked with everyone from small family owned companies to expansive corporate clients, consistently meeting deadlines, performance criteria and business objectives.

groSolar has designed and installed solar solutions for a wide range of commercial and government enterprises. These include food distribution centers, agricultural operations, schools, municipal buildings, multi-unit residential complexes, sports stadiums and resort properties. In most states and for the vast amount of customers, solar energy solutions do in fact make excellent fiscal and cultural sense. Contact us today to find out more.

# COMMERCIAL SOLAR ELECTRIC SYSTEMS

groSolar is the company to choose for commercial solar energy solutions. As part of our full service customer-centric philosophy, we provide:

- Financial Analysis
- Assistance with State Rebate & Utility Paperwork
- Top Rated Installation
- Highest Quality PV Modules & Equipment
- Financing Assistance as Required

Our commercial experts analyze the engineering and economics of a proposed system and provide the information you need to quickly make a decision. If financing is required, groSolar can assist in obtaining capital finance or a Power Purchase Agreement for the system through our proven partners.

groSolar completes commercial projects throughout the United States. Working both directly and with a wide partner network, we provide the expertise and materials you need for high quality sustainable projects.

Select groSolar to perform an evaluation for your site. We will deliver a proposal with financial analysis and preliminary equipment specifications.
