

IEC Chesapeake and groSolar presents:

PV Installation – Safety

“The Most Important Part of a Solar Installation”

At IEC Chesapeake – Odenton Training Center
1424 Odenton Road, Odenton, MD 21113

This 2-hour seminar will address the most common dangers associated with installing PV systems. In this class we won't simply quote OSHA rules to you; we'll share real life experiences and best practices in an engaging and highly value-added way. We want you to be wildly successful in your solar business, and safety is the most important part of the equation to your success.

Course will cover:

- Lifting Safety: getting equipment on the roof without breaking your back
- Ladder Safety: setting the ladder, securing it and using the latest equipment to reduce the chance of a fall
- Fall Protection: Harness, anchoring and working safely on a roof
- Electrical Safety: avoid getting zapped, welding the tips of your tools and burning down the house
- Tailgate Safety meeting: CYA and how to use repetition to reduce the likelihood of an accident
- Recovery from accidents: What to do if an accident really does happen

The instructor, Jeff Gilbert is the Training Manager for groSolar and is responsible for GRO-U, a comprehensive dealer and employee training program. Jeff was the co-founder of Chesapeake Solar, and is also a NABCEP certified Solar PV Installer.

Wednesday May 12, 2010
