

## Why is a Solar PV Project a *Great Opportunity* for a Municipal Utility?

- Diversification:** Diversify your energy portfolio while complying with renewable portfolio standards
- Lower Costs:** Guaranteed output for 20+ years at today's prices, with low maintenance costs
- Manage Peaks:** Quickly deploy generation capacity to specific high peak load areas
- Sustainability:** Utilize renewable energy sources as a premium offering to customers and to meet sustainability initiatives

*“The entire permitting and construction process of the Sterling Solar project was handled seamlessly by groSolar. Presented challenges were handled immediately and we appreciated the high quality and professionalism of the project management team. Most importantly, this solar system will positively impact the town of Sterling by providing green energy to our community.”*

- Sean Hamilton  
General Manager  
Sterling Municipal Light Department

2.4 MW Sterling Municipal Solar  
Sterling, Massachusetts
