*MC Cables include both the male and female connectors and a "Do Not Disconnect Under Load" label.

ReadyWatt® Wires and Cables are UL® listed and built to manufacturers specifications with manufacturer-approved assembly equipment.

ReadyWatt® battery and inverter cables are made using Cobra X flex cable and crimp connectors UL® listed for Class K fine stranded wire. This cable offers a unique flame retardant polyvinyl chloride compound (VW-1), and is moisture, abrasion, acid, diesel fuel, and oil resistant. It is extremely flexible and easy to work with. All connectors are sealed using a mastik filled heat shrink to reduce corrosion. MC cables are also sunlight resistant.

Custom sizes and configurations are also available.
