- Cash incentives in some states
- Keeps energy dollars in the United States

RESIDENTIAL SOLAR ELECTRIC SYSTEMS

What the World Needs. **NOW**®

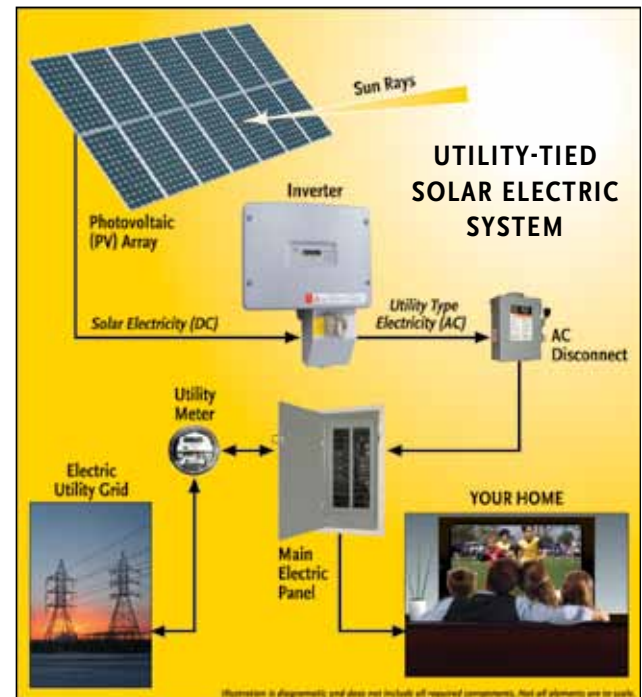

STABILIZE ENERGY SUPPLY AND COSTS

groSolar understands that you are looking for affordable, sustainable and responsible approaches to securing safe and reliable energy. Our industry expertise and premier products from energy technology leaders allow us to provide high value and deliver real solutions.

We provide individual attention to design and install a custom solar energy system that optimizes space, energy production, and reliability, while minimizing your energy risk and exposure.

THE GROSOLAR ADVANTAGE

- Full service provider, designer, and installer
- Leading installer of solar electric systems
- Foremost solar technology products to meet your unique needs.
- Detailed knowledge of state and federal incentive programs and building regulations
- Customized whole-building energy solutions
- Exceptional customer service

Systems can also include a backup power source to supply electricity when the utility is out of service.
